

**ABSTRACT**

1. Qualitative evaluation of narrative responses to Pilot Safety Survey fielded in Fall of 2005.
  - a. Identification and description of themes in narrative responses
  - b. Interpreting relationship of themes to “safety culture” concept
2. Linking themes of narrative responses to the quantitative portion of safety survey in order to look at relationships of pilot characteristics and their perspective regarding importance of safety culture issues
3. Progress report at Spring conference (if RA funding available for Jan/Feb time frame as proposed)
4. Presentation of research results at AMTC in Phoenix
5. Publication of findings as related to critical care transport safety culture
  - a. Link our findings to current “safety culture” literature
